RECT14

Dual Channel, Mini LED warning light

TOMAR's RECT-14LS dual channel, ultra high intensity, LED warning light delivers a huge impact in a small footprint. Dual channels offer independent function of up to two lamp colors with dozens of user-selectable modes.

Made of optical Lexan and hermetically sealed, this one piece, fit anywhere design makes installation a breeze.

At only 4.5" x 1.2" x .7" the RECT-14LS is one of the smallest warning lights on the market to meet SAE J845, SAE J595 and CAL Title 13 specifications.

The RECT-14LS's compact size makes it the perfect auxiliary light for all the hard to fit locations. Mount directly to the body, the rearview mirror, grille or the license plate. A complete line of brackets means you can mount this light practically anywhere.
