Rectangular Rapid-Flashing Beacon Lamp Solutions

Developed to meet the requirements of US DOT Interim Approval IA-21 for MUTCD.

Per IA-21, RRFBs are pedestrian-actuated conspicuity enhancements to supplement standard pedestrian and school crossing warning signs at uncontrolled marked crosswalks.

Self-Flashing Solution

Tomar model: RRFB-A-LEFT

Tomar model: RRFB-A-RIGHT

7.23" w x 3.04" h x 1.17" d (18.59cm x 7.72cm x 2.97cm)

Input voltage +12 thru +24VDC

Includes 2 light levels – standard, and lower intensity (Dim) for night use

These are flashing lamps. A LEFT and RIGHT pair are synced together to provide an RRFB-compliant flash pattern per IA-21.

Waterproof for long service life

Externally Flashed Solution

Tomar model: RRFB-A-SB

7.23" w x 3.04" h x 1.17" d (18.59cm x 7.72cm x 2.97cm)

Input voltage +12 thru +24VDC

Includes 2 light levels – standard, and lower intensity (Dim) for night use

They do not include a sync wire, each lamp is externally flashed/controlled by the customer

Waterproof for long service life
